***Non-compliant response to Election/Restrictions***

Applicant did not elect the species as required in the response to the election/restriction requirement of 3/6/06, which is copied below:

This application contains claims directed to the following patentably distinct species:

A: conducting gas via (A1) a capacitor or (A2) an accumulator

B. Scavenger gas (B1) air or (B2 waste gas from engine

The species are independent or distinct because the capacitor is described as a condenser, where as the accumulator is an absorbent such as zeolite.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from each of groups A and B for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 11 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1723

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

**Corrections:**

1. In a telephonic interview on 6/20/06, applicant was informed of an error in the requirement of election/restriction. Groups I, claims 1-14 should be claims 1-10.

Correction appears below:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to method of fuel supply, classified in class 210, subclass 651.
  - II. Claims 11-18, drawn to device for supply of fuel, classified in class 210, subclass 321.6.
  - III. Claim 19, drawn to membrane material, classified in class 210, subclass 500.39.
2. Also, applicant confirmed that claims 13-18 are claims for the device; they depend from the device claim 11, but erroneously recite "method claims".
